professional learning as part of

Australian Cyber Conference 2019

Tuesday 8 October

1:40pm - 3:05pm

Melbourne Convention Centre

1 Convention Centre Pl, South Wharf VIC

Teachers, come along to the Australian Cyber Conference 2019 conference to learn from industry professionals and take part in a specialised professional learning session designed to enable you with the knowledge and learning resources to inspire students to consider cyber security as a future career.

Today Australia faces a workforce shortage of 18,000 professionals in the rapidly growing field of cyber security. These professionals will help protect our future economy by ensuring that emerging areas like artificial intelligence, data analytics, robotics and medical technology remain free of cyber threats. Jobs in cyber security are in-demand, well-paying, flexible and rewarding.

To inspire the next-generation, the Australian Signals Directorate has sponsored the ASD CyberEXP, a free online program designed to introduce Australian secondary students to career pathways in cybersecurity through the perspective of ASD experts. The PD workshop will provide teachers with background on why all students need to understand cyber security, how to introduce the ASD CyberEXP in the classroom, additional teacher PD opportunities, and related cyber security learning resources and activities for students.

Teachers can attend the **3-day conference for FREE** through the conference sponsors. Teachers will receive professional learning for attending the teacher session on Tuesday October 8th at 1:40pm - 3:05pm and receive a Certificate of Participation. Complimentary tickets are limited. At the Registration page, choose Non-member, Use your education/school email address and include the teacher code to discount payment to FREE.
