SOLO taxonomy: Staying safe online (F-2)

DIGITAL TECHNOLOGIES HUB

We are …				
SOLO LEVEL	One	Many	Relate	Extend
SOLO VERB	*Identify and define*	*Combine and perform serial skills*	*Apply and integrate*	*Create and evaluate*
Success criteria	I can identify a weak password versus a strong password I can identify behaviour that constitutes cyberbullying I can identify potential online dangers	I can use my understanding of a weak password to create a strong and robust password I can use my understanding of cyberbullying to develop a set of guidelines around appropriate behaviour	I can apply safe online behaviour protocols to collaborate respectfully with my peers in an online space	I can collaborate to create a document in an online space that involves the input of multiple people
Digital Technologies Way of thinking		Systems thinking		Design thinking

As learning progresses, it becomes more complex. SOLO stands for the Structure of the Observed Learning Outcome. It is a means of classifying learning outcomes in terms of their complexity. It can help differentiate a task to enable students to operate at their level and provide learning tasks that are progressively more challenging.
