

Makey Makey Musical Ensemble

Topic or idea for music

What are you trying to have the audience imagine when you are playing your composition?

The topic is children marching in the school yard. We have tried to make it repeating so it sounds like stomping but you can hear the rustling sounds of the environment in the back ground.

How does your ensemble work?

Explain how the Makey Makey creates music.

The Makey Makey is like a small computer that connects to the computer. When you touch an input (like the keys) it makes the screen do the output. The Makey Makey goes over the keys and then you can use a circuit to make the keys go.

Algorithm

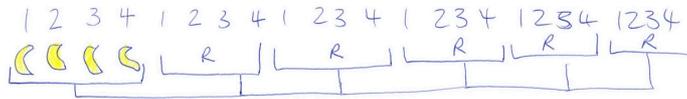

What are the inputs and outputs of your instruments? What are the steps and sequence that your composition has? Remember to add any iterations.

Explains how they have used music to represent action.

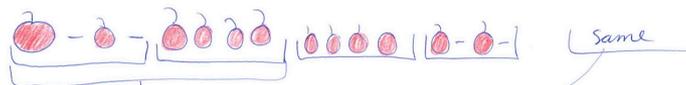

Describes how the Makey Makey connects to computer

Uses language such as input and output

Shows iterations using R as a symbol

Shows steps in a simple algorithm

● = orange
● = apple
● = banana

Makes own language using symbols and uses key to show user
